HOBBY

It is a beautiful to know more about my interests. And the way I do to know more is by reading. Either book or online, I just get lost in the it. I love to read while travelling, it just keeps me enlightened. It brings me joy to know more because the more I gather knowledge I level of my understanding on things increases and what a way to understand without having experienced. Stories with morality is my favorite. I also enjoy reading about technology, startups and about the applications. To summarize, it is my best company to take a tour off the present.

EDUCATION

Dayananda Sagar Academy of Technology and Management

Bachelor of Engineering in Information Science.
Sept 2011 – May 2015

Memorial University of Newfoundland

Master of Applied Science in Computer Engineering.
Sept 2018 – April 2020

WORK EXPERIENCE

Accenture – Application developer analyst

7th oct 2015 – 23rd June 2018

As a developer:

- My responsibility was to develop a middleware platform in Web Methods to create an end to end integrated layer between two different application to communicate with each other with secured connections such as JDBC adapters, HTTP protocol, webservices, SFTP, etc... to send and receive the data across the platform.
- Once the development was completed, I was supporting the integration test and user acceptance test by coordinating with the clients.
- After all the test is completed, I was also involved in moving the code to production environment successfully and validate.
- After the go live, I was supporting the post go live, tracking the transactions, correcting all the defects identified in the code, etc...
- As a senior develop, I was involved in providing knowledge about the development and the application to the new team member and train them by testing their learning ability.
- Mentored a team of five in Enterprise Application Integration.
- Strictly followed company policies, technical procedures and standards for preserving the integrity and security of data, reports and access.
- Coordinated with systems partners to finalize designs and confirm requirements. Collaborated with clients from concept through final delivery of product or service.
- Consistent in meeting deadlines and requirements for all production work orders.
- Provided methodologies for object-oriented software development and efficient database design.
